

Information Brochure and Informed Consent Form: Teaching About Reptile Caretaking

Introduction & Purpose

Thank you for participating. The information brochure before you explains the details of this study. If you have any questions at any point, please feel free to ask one of the researchers. This project focuses on improving reptile care education and is conducted by Fontys Master students Megan Spielberg and Valentino Clerx. The aim is to examine how specific learning elements affect engagement and knowledge retention.

What to Expect

In this study, you will go through a few different stages which will take approximately 25 minutes in total. You will start with an initial questionnaire to gauge your current knowledge on the topic. Following this, we will present you with some information regarding the proper care and keeping of reptiles. To conclude the session, you will complete a final questionnaire regarding the information presented and your overall experience.

Data Collection & Confidentiality

The data that is collected will be treated confidentially at all times and will be handled by Fontys Hogeschool ICT. Collected personal data will be stored with a maximum of 5 years on European Microsoft servers with access restricted to the research team. Your identity will not be linked to your responses in any published reports.

Risks and Benefits

There are no known risks associated with participating. While there are no direct personal benefits, your participation will contribute to research on learning through digital experiences.

Participant Rights

Your participation is entirely voluntary. You are free to withdraw at any time, for any reason, without any negative consequences.
